

# You don't know specific areas where your school's security is most vulnerable?

## Isn't that essentially working without a net?

### Security Vulnerability Assessments (SVA)

- Put a camera here...*
- Install an alarm there...*
- Add more guards here...*
- Prohibit parking there...*

There's an endless list of "quick fixes". And they are rarely the answer.

Now more than ever, educational facilities have become very security conscious. Recent events have triggered concerns across the nation. Yet few facilities have begun the process to determine the efficacy of their own program., identify where opportunities to improve exist, or how to cost-effectively make the needed improvements. As a result, academic institutions often end up spending thousands of dollars on hardware, software, and staffing, only to still have undiscovered areas of vulnerability.

The first step in a sound program is a thorough assessment by security professionals. At Sorensen, Wilder & Associates, (SWA), our team has been helping schools improve safety for almost 30 years. Our team will conduct a thorough SVA, and use the findings to partner with your leadership to develop a plan that addresses your specific areas of vulnerability.

We have worked with clients nationwide including:

- Kankakee School District, IL
- Danville School District, IL
- Everett School District, WA
- Anna Marie University, MA
- Central Comm School District, IL
- Suburban Cook County ROE, IL
- Princeton University, NJ
- Marshalltown School District, IA
- Maryville Academy, IL
- Passaic School District, NJ
- Illinois Principals Association

...and many others. School administrators today know that security is critical. One adverse event can be catastrophic for you, your students, families, faculties, staff, and community. To maintain security, you need a thorough assessment of your risks, and a plan to address your areas of vulnerability.
